To whom it may concern,

It is with great pleasure that I recommend Patryk Nusbaum for employment. As a part of the software development team at Gociety, he has proven repeatedly to be a strong leader and software engineer. He was willing to work with us to find the best technical solutions for our business requirements, took on a role of leadership, easily learned new things and gave critical feedback when necessary.

In particular, Patryk was a quick thinker and very bright. I truly believe he could take on any role he found interesting. His work as a full stack developer was very strong.

It's also worth mentioning that we are a startup in the US. Patryk was able to understand the cultural differences and assist both teams in understanding how we can better work together. Patryk is a natural leader whose energy and enthusiasm is contagious. We wish him all the best in future endeavors.

Sincerely,

Anna Thielke
